

Happy Holidays from [Green Light Group](#)!

This year, [Green Light](#) marked **10 years** of offering consulting services to help advance efforts on climate change, clean energy, and broader sustainability challenges. In honor of the occasion, [Green Light](#) has joined the modern world, and you can now follow [Green Light](#) Principal Dave Grossman on Twitter ([@GreenLightDaveG](#)).

Over those 10 years, [Green Light](#) has remained fortunate in getting to work with tremendous clients and colleagues — non-profit organizations, philanthropic foundations, businesses, trade associations, intergovernmental organizations, and other consultancies. Offering research, analysis, writing, and strategic advisory services, [Green Light](#) has worked both independently and in conjunction with other consultants on a range of interesting and impactful projects. In 2015, those projects included:

- Serving as rapporteur and producing public reports for **six Aspen Institute dialogues**: the [Energy Policy Forum](#); the [Clean Energy Innovation Forum](#); the [Forum on Modern Shale Gas & Oil Production](#); the [Global Forum on Energy, Economy and Security](#); the [Aspen-Nicholas Water Forum](#); and a Latinos and Society Program forum on boosting Latino civic participation.
- Co-authoring [articles](#) and conducting outreach for Climate Law & Policy Project on ‘action approaches’ — market-based **policies to spur low-cost, high-ambition reductions** in greenhouse gas emissions — particularly as a means of complying with the U.S. Environmental Protection Agency’s Clean Power Plan.
- Continuing to advise the Edwards Mother Earth Foundation on its **state-level energy efficiency granting program**, including helping to organize and run the 5th forum for its grantees (with David Gardiner & Associates).
- Helping the Pennsylvania Environmental Council develop a **strategy for its energy and climate work**.
- Conducting (in collaboration with David Gardiner & Associates) an evaluation of the Conservation International/BHP Billiton Global Alliance — a leading **partnership to preserve land of high conservation value** in key regions around the world — and offering recommendations for ways to advance the Alliance’s global conservation goals in the future.
- Serving as rapporteur and producing a concise [report](#) capturing the key insights from the American Council on Renewable Energy (ACORE) 2015 **National Renewable Energy Policy Forum**.
- Drafting a white paper on **high-performance buildings** for a leading private-sector provider of building products and systems (with David Gardiner & Associates).
- Providing **appliance efficiency** research and analytical expertise to help Climate Advisers develop a campaign to convince major retailers to improve the energy efficiency of the fleet of appliances they sell.

[Green Light](#) looks forward to continuing to partner with clients to advance their climate, clean energy, and sustainability work in the year ahead and in years to come. If you are interested in learning more about any of the projects above, or if [Green Light](#) can be of service to you in your work, please do not hesitate to get in touch.

With best wishes for a happy holiday season,

Dave Grossman  
Principal, Green Light Group
